

## APRONS, HAIRNETS & BEARD COVERS

Protection of food is vital according to the health regulations and of course for your company's reputation. It is very important to be recognized for the high standards and quality of all food produced in your kitchen or in your bakery. Our affordable aprons made of polyethylene, our hairnets in non-woven material and beard covers are made for that purpose.

Our disposable aprons are protective, affordable, practical and easy to use at deli, bakery, meat and fish departments. The aprons are made of strong polyethylene plastic and are folded individually in a dispenser box. Our hair protective items are a very important aspect of kitchen apparel, and both products are essential for protection of food. A hairnet is an unobtrusive method of protecting food from hair. Hairnets in non-woven are both comfortable and functional.
